M. GLENNAN, OWNER,

THE CIRCULATION OF THE VIRGINIAN is LARGELY IN EXCESS of any other paper published in Eastern Virginia.

Its circulation in Norfolk and Portamouth is greater than that of any paper published or circulate in the two cities.

It is delivered in the cities of Norfolk and portsmouth and subarbs for 10 cents a week. Nail subscriptions, postage paid. Five Dollars per year, Three Dollars for ir mouths, One Dollar and Fifty Cents for three months; and Fifty Cents for one month.

Advertisements inserted at the respective

the same.

The Weekly Virolvian and Carolinian, eight pages, is delivered, postage paid, three months, 25c.; six months, 50c, twelve months, \$1

Entered as second-class matter.

Hon, Amos J. Cummings gives up his \$5,000 office in preference to resigning from Tammany.

White caps whipped a man named Zeeley and his wife near Eikhart, Ind .. and compelled them to leave the country. This was in Indiana.

Editor Watterson declares that he 'never wrote but one financial article in his life, and that was in favor of the gold standard twenty years ago.'

The postoffice in India not only coland other articles, but acts to a certain extent as a banker to the general publie, sells quinine and salt, pays military pensions, and collects the revenue ac eruing to the Government from land and other sources.

SHINERAL AND MEVAL PRODUCTION OF THE UNITED STATES IN 1893 AND 1894,

The Engineering and Mining Jour nal has prepared a table of the mineral production of the United States during the years 1893 94, compiled for its anunal volume, "The Mineral Industry." The total value of the mineral products of the country, as shown in this table, was \$615,887,108 in 1893, and \$553,352,996 in 1894, showing a decrease in values (not quantities) last year of \$62,534,112, or 10 per cent. To arrive at the net value of the mineral and metal production in each year a deduction must be made from the total for that of substances, the value of which has necessarily been duplieated in the tables. Such for instance. are the antimony ore used in making the metal; the bauxite used in making alum and aluminum; the coal-chiefly slack-used in making coke; the copper used in making sulphate; most of the I ad used in making coke; the copper used in making sulphate; most of the lead used in making white lead; the manganese ore used in making spiegeleisen and ferromanganese, which are included in pig iron, zine used in making zine exide, etc., etc. A careful estimate of the proper amount of these deductions gives \$13,000,000 in 1894, and \$15,000,000 in 1893, which would leave the net total value of our mineral production in 1893 equivalent to \$600, 887,108; and in 1894 equivalent to \$510,352,996.

The quantities produced of the leading materials last year show a much less decrease than has been generally be lieved, even by well informed persons. To take a few leading items, for instance, the production of bituminous coal, which is really an index to the condition of the manufacturing indus try, showed a decrease from 1893, notwithstanding the strikes which prevail ed, of only 11,000,000 tons, or about 9 per cent, while that of anthracite coal actually increased by 4,700,000 tons, or nearly 10 per aunt. in the total output of fuel was less than 6,221,000 tons, or 3; per cent, while the decline in value was 7 per cent. In pig iron the decrease was comparatively small, only about 400,000 tons. At the close of 1894 the furnaces were running at a rate which promises to make the production of 1895 exceed 9,000,000 tons, which has thus far been the highest mark of our production. In some other important metals again there was an socual increase, amounting in the case of copper to 26,250,000 lbs.

The silver production of the United States was maintained at a much higher level than had generally been expected. In 1893 the production was 60,500,000 onnes, a decrease of 4,500,000 ounces from 1892, when it reached its highest lowel. The low price with which 1894 opened and the withdrawal of the artificial demand orested by the Sherman law led many persons to believe that the reduction would approximate the amount of the Government purchases under that law, or 54,000,000 nunces, which would have been equiva-

dustry. The actual decrease in 1894 was only 10,654,000 ounces, or about per cent.

Perhaps the most notable feature of the year is the merease in the output of gold. From time to time throughout 1894 the diversion of capital and labor from silver to gold mining has been noted. Not only have many new gold discoveries been recorded, but in many cases also old mines which had Men's been abandoned because they would not pay with the wasteful and defective methods of early days have been repened with prospects of success under better and more careful methods. The total output of gold in the United States last year was \$39,761,000, an increase of \$3,806,000 over 1893 and of month.

Chyn Adver has also made South Africa a close competitor for the first rank as a pro lucer of the yellow metal.

The table shows a moderate decrease production, a much larger proportional decrease in the value or prices, but in both cases the decrease upon the whole less than the general expectation of its amount. It shows also that in a year of extremely unfavorable conditions the mineral production of the United States by its extent and variety still gives the country the foremost place among the nations of the world.

The conditions under which the year loses were far more favorable than those with which it opened. The year lects and delivers letters and parcels 1895 is already beginning to show a very great improvement over its pred

Love to Love.

When thou shalt need me, send my soul som-

When thou shalt need me, sond my soul some word,
Let but a single drift from thy life to mine,
And like the light my love to thee shall shine,
My soul soar to thee like a singing bird,
And sweeter songs than love hath ever heard
Will I sing to thee while I kneel and twine
With thornless rease that dear brow of thine,
My love thy shelter, by no storm winds stirred.

Yea, when thou need'st me, speak, and I shall hear,

hear.
Though oceans roll between. Home sense of theo
Shall make the light a message. I shall mark
A meaning in the darkness and draw near.
And thou shalt know, wherever thou may'et be.

My step and feel my warm clasp in the dark. -Frank L. Stanton in Atlanta Constitution.

Record Breaking Sale

SLAUGHTER! SLAUGHTER! SLAUGHTER

Owing to an over-production of stock, we have inaugurated this mammoth and record-breaking sale of clothing, though we have always been regarded as the kings of low prices. Necessity compels us to make a still greater sacrifice. We must raise money, so without reservation, \$12,000 worth of our stock must be closed out within the next 30 days. It will pay you to come a hundred miles to secure some of these extraordinary bargains—a chance you will never gains—a chance you will never have again in a lifetime. We will loose money on every item sold, but to accomplish our object, we are ready to make any sacrifice.
